

DEAN OF STUDENTS' AFFAIRS

PAUL PAYNE, BEd, BA

I am indeed delighted to welcome you to the American University of Montserrat in the "Emerald Isle of the Caribbean" as Montserrat is internationally known. You will find an environment conducive to learning on this tranquil and friendly island. One international Singer and Songwriter described Montserrat as "Strangers Paradise. You will be attending classes on the island where **Paul McCartney** and **Stevie Wonder** wrote and recorded the song "**Ebony and Ivory**". The American University of Montserrat has chosen this crime-free island so that your safety and security is ensured while you study. The Island's beaches, scenic trails and annual festivals will provide the added attractions whenever you take a break from your studies. You will also find an island population that will welcome you with open arms and I too, as a member of this population.

Paul Payne, BEd,BA.

"What we look for in our Students"

**Commitment to continuous learning,
Commitment to Health care Service,
Ethics,
Empathy,
Motivation,
And Intellectual Traits!**

Education is the cornerstone of becoming a medical Doctor , Achieve Your Dream . Apply now !

At American University of Montserrat, Education is :

DOCTOR of MEDICINE PROGRAM

American University of Montserrat (AUM) offers Doctor of Medicine program designed to meet the United States Medical Licensing Examination (USMLE). The curriculum is designed for students who wish to practice medicine in the USA, Canada, and the United Kingdom and is recognized by many countries.

The MD program is comprised of two divisions; Five semesters of Basic Sciences and five Semesters of Clinical Clerkship. Clinical Clerkship semesters are in affiliated hospitals in the United States of America, Canada, and the United Kingdom. The Basic Science curriculum has been designed to prepare students for Step 1 of the United States Medical Licensing Examination.

DEAN'S MESSAGE

Shakeel A Usmani, MD

It is my distinct pleasure to welcome you to the medical school at the University of Montserrat. We here at the University of Montserrat, are beginning our journey to establish an institute that will provide the fundamental medical education needed to help heal the sick. We aim to strive for the best. Our destination is to lead in the health sciences. Our goal is to provide the best medical education to our students. Our mission is noble; to heal those who are sick in the realm of medical education, our students are amongst the best, brightest, and come from the most accomplished institutes. However, it takes more than high- grade point averages and good test scores to make a great physician. Who you are as a person plays just as vital a role as your academic achievement. That is why when considering students for acceptance to our Institute, we look closely at what individuals have done outside the classrooms and how they have interacted with the world around them. We view our medical students as the next generation of medical leaders, and therefore will train and treat them accordingly. There will be a partnership, collegiality, and mutual respect between our students and our faculty that is rarely duplicated. Our students will have the chance to learn not just from the great minds who populate our faculty but also from the patients from whom we learn so much. To learn from patients is a privilege, one we believe Requires our students to possess the highest levels of candor, character, sensitivity, and integrity. Practicing medicine at this current time is not only about managing patients but also understanding the world we live in. The ability to relate to patients cannot be taught in the classroom or gauged on a written exam. Likewise, the character cannot be determined solely through test scores. Academic excellence, ambition, and unwavering work ethic are crucial to pursuing a medical education. I firmly believe that practicing medicine is an art. It takes more than learning in classrooms, studying from books, and achieving good scores on exams. Being a provider in healthcare is a privilege and an honor. We have laid a foundation. We have selected the faculty which will enable us to reach your goals. I am delighted to welcome you here to join our journey.

Shakeel A Usmani, MD

Shakeel A Usmani MD

"The Faculty at American University Montserrat is comprised of M.D.s and PhDs trained in the U.S.A., Canada, U.K., and Indian subcontinent. Their collective experience in medical education, research, and clinical practice contributes significantly to the educational experience. Students are kept at the forefront of medical advances. A low student/teacher ratio enables us to extend our students a better focus and attention and give a certain level of autonomy pursuing their education compared to other schools."

BASIC SCIENCE DIVISION OF THE MD PROGRAM.

Semester 1:
Cell Biology Epidemiology/
Preventive Medicine Doctor/
Patient Skills I

Semester 2
Biochemistry/ Medical
Medical Genetics, Medical
Physiology Neurosciences
Doctor/Patients Skills II

Semester 3:
Pathology I Microbiology/
Immunology Behavioral
Sciences/Medical Ethics
Doctor/ Patient Skills III

Semester 4:
Pathology II
Medical Pharmacology
Clinical Correlation

Semester 5:
Physical Diagnosis
Introduction to Clinical
Medicine Board Review

GENERAL PRINCIPLES:
Biochemistry
Immunology
Microbiology
Pharmacology
Pathology

HUMAN ORGAN SYSTEMS:
Cardiovascular System
Endocrine System
Gastrointestinal System
Hematology and Oncology
Musculoskeletal,
Neurology and Special Senses
Psychiatry
Renal System
Reproductive
Respiratory System

CLINICAL CLERKSHIP DIVISION OF THE MD PROGRAM .Mandatory Clinical Core Rotations (48 Weeks):

Mandatory Clinical Core Rotations

- ❖ SURGERY -12 weeks
- ❖ INTERNAL MEDICINE – 12 weeks
- ❖ OB/GYN – 6 Weeks
- ❖ PEDIATRICS – 6 Weeks
- ❖ Psychiatry – 6 Weeks
- ❖ FAMILY MEDICINE – 6 Weeks

Elective Rotation

(4, six week rotation in one of the following fields):

- ❖ CARDIOLOGY - 6 weeks
- ❖ EMERGENCY MEDICINE - 6 weeks
- ❖ NEUROLOGY - 6 weeks
- ❖ RADIOLOGY - 6 weeks
- ❖ ANESTHESIOLOGY - 6 weeks
- ❖ FAMILY MEDICINE - 6 weeks
- ❖ PATHOLOGY - 6 weeks
- ❖ UROLOGY - 6 weeks
- ❖ GERIATRICS - 6 weeks
